

LOGLIFT 251S

PRODUCT BROCHURE

PERFECT FOR
LONG DAYS AND LOGS

Handling heavy loads is one thing, handling heavy and long loads is a real challenge. With LOGLIFT 251S you are perfectly equipped for the task.

The power-to-weight ratio of the LOGLIFT 251S is in a class of its own. A light and durable structure makes larger payloads and more efficient load cycles possible. The safe control position with

its adjustable high seat and ergonomically designed controls guarantee a comfortable working day. The LOGLIFT 251S even is available with the latest HiVision system allowing you to work safely and comfortably from the truck cabin. Together, the components of the LOGLIFT 251S increase reliability and efficiency. LOGLIFT 251S has a track record of extraordinary long service life which keeps the lifetime costs to a minimum.

LIGHT AND DURABLE FOR EXCELLENT PERFORMANCE

Our forestry cranes have always delivered exceptional performance and rugged durability with low lifetime costs. The LOGLIFT 251S is no exception. Discover why this crane is the perfect choice for you.

Oil filled base

Keeping the slewing mechanism immersed in oil is a prerequisite in the heavy-duty type of work that our cranes perform. The oil bath provides smooth and precise slewing and reduces wear on the mechanism, keeping repair and service costs to a minimum.

Next generation forest people

HiVision™ is a new way of operating forestry cranes, using camera-based 3D vision technology. Work efficiently, increase payload and save fuel. With the camera-based 3D you operate your crane as you've always done, using the controls you've grown accustomed to over the years. The only difference is that you see the work area in special 3D goggles.

- Stay in the comfort of your truck cabin
- Be safe and work with optimal ergonomics
- Save weight and fuel
- Be more efficient when gaining payload

HIVISION™ 

Optimal weight capacity ratio

Get the most of your investment. With the optimized weight/capacity ratio the JONSERED F251S can even be fitted to smaller trucks.

Hose Protection Link (HPL)

Wireless scale

Oil bath

Telescopic boom system

nDurance™

Swivelling couplings

Double rack slewing

Three-point bridge

HPL™ (Hose Protection Link) to guard against blows and sticking

Protecting hoses on any crane is important, but especially in the harsh environment of log handling. Hose Protection Link (HPL) gives extra protection — from crane tip to rotator — against accidental impacts. The system includes the rotator and hanger to provide a complete and integrated solution.

- Robust link with a 40 mm upper pin
- Generous bearing dimensions for minimum wear
- Cleverly designed plug-in fittings
- Easy access for tightening, service and maintenance
- Quick-change hoses

nDurance™

nano-technology paint process for all-weather protection

Rain, dust, sand and sunlight are unforgiving forces that wear on a crane all year around. This is why we have created nDurance — a technologically advanced and environmentally sound pre-treatment and paint process, based on nano-technology combined with state-of-the-art e-coating and powder painting.

- Nano-technology covers every square millimetre
- Three different protective layers for highest corrosion resistance
- 100 % phosphate free
- No heavy metals and virtually zero waste

LOGLIFT 251S BASIC DATA

BUILT TO PERFORM

Hiab is the world's leading provider of on-road load handling equipment. Customer satisfaction is the first priority for us. Hiab's product range includes HIAB loader cranes, JONSERED recycling and forestry cranes, LOGLIFT forestry cranes, MOFFETT truck mounted forklifts and MULTILIFT demountables, as well as DEL, WALTCO and ZEPRO tail lifts.
