

RD45

Tandem Rollers

Powerful and versatile

The rollers of the RD45 series are articulated tandem-axle rollers, which are also available with an oscillating drum or as a combination roller. Due to the low machine height, the articulated joint and the optimal view, the RD45 rollers can be used in a variety of ways. Due to the oscillating drum that exists with the RD45-140O model, the entire compaction force is transmitted into the ground thanks to the two installed eccentric weights.

- Edge pressing and cutting equipment for a clean edge of the paths
- Installed articulated pendulum joint ensures for even compaction, a high level of maneuverability and optimal driving stability
- Three model versions: Tandem-axle roller with 2 vibrating drums, combination roller or tandem-axle roller with oscillating drum
- Optimal visual conditions due to the slim design
- Safe ROPS (Roll Over Protective Structure) that can be folded back for transport

Crab steering

The drum offset allows for easy maneuvering when compacting along walls. In crab steering, the roller can be conveniently controlled in any desired direction.

Articulated pendulum joint

Uniform compaction, optimal driving stability: The three-point articulated pendulum joint ensures a uniform weight distribution on the front and rear drum at all times. This also improves the maneuverability and provides for maximum stability when turning curves.

Vibrating drum

Ideal for all traditional compaction work.

The vibrating drum optimally oscillates the material to be compacted with quick successive vertical forces. The built-in eccentric weight provides for a fast rotation and an excellent compaction performance.

Oscillating drum

Flawlessly compacts even asphalt at low temperatures.

**Perfectly suited for the compaction of seams (hot to cold).
Trouble-free operation on bridges.**

Rollers with an oscillating drum compact with a high efficiency, since the drums maintain permanent contact with the ground. With its two synchronous rotating eccentric weights, the drum uses forward and reverse movements to direct its entire compaction force into the ground.

Optimal view

Everything is perfectly within view: With the specially designed, tapered design of the roller, you always have an excellent view of the drum edges, the machine environment and the job site.

**WACKER
NEUSON**
all it takes!

Service network

We are always there for you: Thanks to our close-knit service network, you can always rely on our quick support.

Finely tiered model

selection

Different tonnages and a diverse selection of tandem-axle rollers with vibration and oscillating drums as well as combination rollers: Choose exactly the model that you need for your project.

First-class compaction performance

Regardless of which of our models you choose – one thing is certain: You will be impressed with the compaction performance of our rollers. Guaranteed!

Built-in user comfort

All of the Wacker Neuson models can be easily operated for particularly pleasant work.

iF Design Award 2016

The tandem roller series RD won the iF Design Award 2016 in the product category. The RD series convinced above all by the clearly structured operating elements and the intuitive handling, which is supported by the design.

Technical specifications

	RD45-140	RD45-140C	RD45-140O
Operating data			
Operating weight with ROPS kg	4,345	3,995	4,435
Operating weight max. kg	5,300	4,960	5,640
L x W x H mm	2,860 x 1,506 x 2,720	2,860 x 1,506 x 2,720	2,860 x 1,506 x 2,720
Drum width mm	1,380	1,380	1,380
Drum diameter mm	900	900	900
Operating width mm	1,430	1,380	1,430
Ground clearance Middle mm	305	305	305
Drum type Front	smooth / undivided	smooth / undivided	smooth / undivided
Drum type Rear	smooth / undivided	Tires	smooth / undivided
Axle load Front kg	2,175	2,175	2,175
Axle load Rear kg	2,170	1,820	2,260
Curb clearance mm	63	63	63
Centrifugal force Level I kN	64	64	64
Centrifugal force Level II kN	39	39	39
Frequency Level I Hz	60	60	60
Frequency Level II Hz	51	51	51
Amplitude Level I mm	0.51	0.51	0.51
Amplitude Level II mm	0.31	0.31	0.31
Oscillation frequency Level I Hz	0	39	0
Oscillation frequency Level II Hz	0	30	0
Tangential amplitude mm	0	1.37	0
Oscillation force Level I kN	0	72	0
Oscillation force Level II kN	0	43	0
Linear force static (front) N/mm	15.8	15.8	15.8
Linear force static (rear) N/mm	15.7		16.5
Advance travel max. m/min	184	184	184
Gradeability with vibration %	30	30	30
Gradeability without vibration %	40	40	40
Turning radius inside mm	2,650	2,650	2,650
