

BISON 120

JAW CRUSHER

COMPACT | EASY TO TRANSPORT | INTUITIVE OPERATION

The Bison 120 has been specifically designed for operators for whom versatility, maneuverability and transportability are of key importance. It is small enough to fit inside a container for transport but strong enough to withstand the toughest of applications. The Jaw is driven hydraulically allowing the customer the ability to reverse the Crusher to clear a blockage as well as being able to run in reverse permanently for sticky applications such as asphalt. The ability to adjust the jaw setting and operate the plant fully from the remote control allows for a fast and simple set up for the customer. With its intuitive operation, quick set-up times, compact size and ease of transport the Bison 120 the ideal solution for all small to medium sized operators.
